Kahoot

online or app

https://getkahoot.com

Kahoot enables students to answer questions in real-time through an easy-to-use interface. They play against each other aiming to top the on-screen leaderboard. Kahoot supports all devices that have Internet access.

Create a free teacher account.

1. **Login to Getkahoot.com.**
2. **Click on the type of activity you want to create:**
   a. **Quiz** - points-based, multiple-choice quiz with unlimited questions
   b. **Survey** - gather opinions with 1 question
   c. **Discussion** - facilitate a debate with 1 question

**Directions for creating a quiz:**
1. Type a name for your quiz and click Go!
2. Type your question in the box by Question 1.
3. Drag and Drop or Browse to find an image to associate with your question. If you do not choose an image, Kahoot will insert a Kahoot logo for you.
4. There are two drop-down menus at the top, right side of your screen. You can choose to have your question be a No Points Question or a Points Question and you can determine the amount of time limit for the question.

![Points question and Time limit](https://getkahoot.com)

5. Fill in your answer choices and click on the red, Incorrect box on the right answer. You can delete answer choices by clicking on the minus sign.
6. Click Add Question and repeat the above steps.

![Add question button](https://getkahoot.com)

7. When you have added all of your questions, select the Next reorder questions button.
8. Drag questions to change the order, if desired.
9. Click the Next settings button.
10. You have several options on this page, including Audience Type, Language, Privacy Setting, Difficulty Setting, Description and Tags. You are required to select a Language and Audience Type.
11. Click the Next cover image button.
12. Drag and Drop or Browse to find an image to associate with your quiz. If you do not choose an image, Kahoot will insert a Kahoot logo for you.
13. Follow the directions to test your Kahoot Quiz on a mobile device.
Launching a Kahoot
1. Your computer or device must be connected to a projector.
2. Login to Getkahoot.com
3. Click the Me button at the top of your screen.
4. Locate the quiz from the list of quizzes in your account and select Play.
5. You will see some options for your quiz that you can turn on/off.
6. Click Launch.
7. The student directions will be displayed on your screen:
   a. Join at Kahoot.it.
   b. Game-Pin will be displayed for students to type in.
   c. Students will be asked to enter a nickname once they have entered the Game Pin.
8. Student names will appear on your screen as they login to Kahoot.
9. When all students have entered the game, select the Start Now button.
10. You can move through the quiz by selecting the Next button.
11. Select the Final Scores button at the end of the quiz to download results.
